MEMORANDUM FOR Commanders, Supervisors, Safety Professionals, and
Unit/Organizational Collateral Duty Safety
Representatives

SUBJECT: U.S. Army Military District of Washington Master
Accident Prevention Plan (MAPP) Handbook

1. This handbook was prepared to provide commanders, supervisors, safety professionals, and unit/organizational collateral duty safety representatives information on specific topics to use for planning internal safety training in accordance with the MAPP 2000.
2. The leading cause of accidents throughout MDW continues to be slips, trips, and falls and back injuries for civilian employees, and sports related injuries for soldiers. The MAPP 2000 and Handbook have been designed to emphasize countermeasures in these areas along with other safety prevention topics. While organizations are encouraged to adapt briefing topics to their mission, these accident areas are applicable command wide and should be used for internal accident prevention training purposes.
3. If you need additional information or materials on other safety related topics, please contact your local installation safety office.
